PROFESSIONAL SUMMARY

Currently pursuing an M.Sc. in Computer Science and specializing in Vulnerability Assessment and Penetration Testing (VAPT) with a dedicated focus on Web Application and API Security. Proficient in mapping adversarial attack vectors, manually exploiting OWASP Top 10 flaws, and evaluating infrastructure defensive postures. Adept at interpreting application logic to discover security bypasses and conducting secure code reviews.

TECHNICAL SKILLS

Application Security (Web & API): OWASP Top 10 Application Security, API Penetration Testing, Business Logic Flow Identification, Input Validation Bypasses, Session Hijacking Countermeasures.

Mobile Security (Foundational): Static & Dynamic Analysis basics, Android security internals.

Offensive Security & Network Auditing: Ethical Hacking Methodologies, System Exploitation Testing, Port Scanning, Protocol Enumeration, Traffic Packet Analysis, DoS/DDoS Mitigation Frameworks.

Tools: Burp Suite (Repeater, Intruder), OWASP ZAP, Nmap, Wireshark, Metasploit Framework, Nessus, OpenVAS, Hydra, SQLmap, Bettercap, Nikto.

Operating Systems & Environments: Kali Linux, Windows Server, Metasploitable Target Environments.

PROJECTS

Web Application VAPT & Manual Exploitation Lab

- **Environment Deployment:** Configured an isolated virtual testing lab deploying the Metasploitable framework to host DVWA (Damn Vulnerable Web Application) for controlled security assessments.
- **Manual Exploitation:** Utilized Burp Suite to manually intercept and manipulate HTTP traffic, successfully identifying and exploiting high-impact vulnerabilities including SQL Injection (SQLi), Cross-Site Scripting (XSS), and Broken Object-Level Authorization (BOLA).
- **Logic & Security Control Bypasses:** Analyzed application source code and workflows to execute parameter tampering, bypass weak client-side security controls, and perform manual session hijacking operations.
- **Remediation & Secure Code Review:** Conducted source code evaluations to identify root causes of structural flaws; documented remediation strategies including parameterized queries, cryptographic storage defenses, and custom security headers.

PROFESSIONAL CERTIFICATIONS

Google Cybersecurity Certificate

Coursera

Programming with Python 3.X

Simplilearn

Microsoft Office Specialist

Microsoft

EDUCATION

Master of Science (M.Sc.) in Computer Science

Sinhagad College, Pune

2025 – Present

Bachelor of Science (B.Sc.) in Computer Science

Modern College of Arts, Science and Commerce, Ganeshkhind, Pune

2022 – 2025
